

FOR IMMEDIATE RELEASE  
SPRING 2020

## FRANI LUGO - MULTI DISCIPLINARY ARTIST - BIO

Multidisciplinary artist Frani Lugo brings in a new decade with the continued deployment of his own brand of post-modern rock in multiple live performance formats. His continued multi-instrumental solo live music expeditions are now being complimented with a trio-based ensemble that intrepidly interprets original and well-known rock selections. His performances are delivered with a razor sharp tightness and tenacious precision.

Audiences realize that they are being offered an eclectic mix. While some express the connection they hear with American classic rock elements, others find a deep connection with world music beats while even others cannot escape the fact that most, if not all, is being driven by sound beds of adept instrumental execution.

In his sixth release titled "Armed", Frani produces the volume in its entirety. Coupled with his previous releases "Flugo", "Megalopolis", "Ape", "Stil Life Circus" and "Aamongus", Frani launches into varied interpretations of the material that create a wide palette of sounds which translate to a unique experience when you see it performed live on stage.
